

Final Program Agenda:

“Registry Studies and Health Technology Assessment (HTA)”

Thursday, June 23, 2022

Free Virtual seminar

15:00 – 17:00 CET

This Basel Biometric Society (BBS) and the European Federation of Statisticians in the Pharmaceutical Industry (EFSPi) are hosting this virtual meeting on the use of disease and product registries in drug development and commercialization, a topic which is receiving growing interest from pharmaceutical companies, regulators, and payers/HTA bodies.

This Seminar presents statistical and epidemiological approaches along with case studies that involve using registry data to improve accuracy in estimating and predicting outcomes in the real-world setting that aims to benefit patients and healthcare systems.

Final Agenda

- | | |
|--------------|--|
| 15:00-15:05 | Welcome and Introduction
Fred Sorenson, Xcenda, Switzerland |
| 15:05-15:25 | An open dialog on the issues faced and lessons learned with respect to Novartis Gene Therapies’ Spinal Muscular Atrophy (SMA) registries
Eric Faulkner and Omar Dabbous (Novartis Gene Therapies, USA) |
| 15:25-15:40 | AIFA registries: past and current & upcoming challenges
Entela Xoxi (Università Cattolica del Sacro Cuore, Italy) |
| 15:40-15:55 | Issues in the design and analysis of registry-based studies for regulatory and HTA purposes
Jinma Ren (Pfizer, USA) and Friedhelm Leverkus (Pfizer, Germany) |
| 15:55 -16:10 | Registries in China: Guidelines, trends and new technologies
Mei Yang (Happy Life Technology, China & USA) |
| 16:10 -16:25 | Hospital Perspective on using Registry Data for HTA
Rossella Di Bidino (Fondazione Policlinico Universitario Agostino Gemelli, Italy) |
| 16:25 -16:40 | Case studies using Registry Data for HTA in Scandinavia
Kirk Geale (Quantify Research, Sweden) |
| 16:40-16:55 | FlywheelIMS Case Study - A complete web-based digital registry of 5,000 patients with Multiple Sclerosis in the USA
Kat Belendiuk (Genentech, USA) |
| 16:55-17:00 | Close-out and end of the meeting |
